

AUTO-RC

RECLAIMING CONCENTRATE

APEO/NPEO FREE

AUTO-RC is an extremely concentrated non-foaming solution designed for the removal of photo-polymer, diazo, and capillary film emulsions. AUTO-RC is ideal for automatic screen washing and reclaiming machines. AUTO-RC will not crystallize, coagulate, or plug rinse jet nozzles in automatic application systems.

Advantages

- Ideal For Use in All Automatic Reclaiming Systems (Will Not Crystallize, Coagulate, or Plug Nozzles)
- Economical
- Easy to Use
- Immediately Breaks Down Emulsion
- Safe on All Types of Mesh
- Non-Hazardous
- Biodegradable / Drain Safe
- Super Concentrated

Application - Reclaim Machines

Dilute 1:30 or up to 1:50 with water. AUTO-RC dilution strength depends on what type of emulsion/stencil is being used and the machines reclaim speed.

Application - Manual

AT THE SINK:

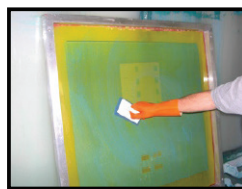

Dilute 1:30 or up to 1:50 with water. After removal of ink, block-out and tape, apply this product to both sides of a wet screen. Scrub both sides of the screen and allow the product to penetrate. Starting at the bottom of the screen, high pressure water rinse both sides until all emulsion residue is gone.

1. Apply

Step 1. After removal of ink, block-out, and tape, apply AUTO-RC to a wet screen (both sides).

2. Scrub

Step 2. Scrub screen with non-abrasive pad or brush.

3. High Pressure Rinse

Step 3. High pressure rinse starting at the bottom.
