CHEMCON DE-FOAMER C

Concentrated De-Foamer

General Description

ChemCon De-Foamer C is a highly concentrated de-foamer designed to control excessive foaming. ChemCon De-Foamer C is ideal for use in recirculation systems. ChemCon De-Foamer C's extremely high concentration allows minimal amounts to be used. This allows it not to interfere with the performance of the product it is being added to. ChemCon De-Foamer C can be added to both solvent and water-based systems.

Quick Tip:

Always start with a very small amount initially. Allow to fully disperse in solution. Add more if required.

Advantages

- Easy to use
- Economical
- Low odor
- Extremely concentrated
- Disperses rapidly
- Water-based
- No VOC (Volatile Organic Compounds)
- Non-Hazardous
- Stays active in solution
- Drain Safe

Application

Recommended dilution is 4 oz. per 30 gallons of solution. Add ChemCon De-Foamer C directly to solution and allow to disperse. Add more as needed.

Sizes Available:
