

DTF FILM

DTF film is a specialized printing medium designed for direct-to-film printing applications. It offers high-quality imaging capabilities suitable for various printing projects, including textiles and garments. DTF film is engineered to deliver vibrant, durable, and precise prints with exceptional detail and color reproduction.

Product Overview/ Advantage

- Matte finish on both sides for precise printing
- Hot / Cold peel design
- Sharp and detailed prints with excellent color fidelity, ensuring superior image reproduction
- DTF film is very durable and resistant to fading, scratching, and abrasion.
- Wide color gamut for vibrant and accurate color reproduction

Application:

- Ideal for printing designs onto t-shirts, hoodies, sweatshirts, and other apparel items.
- Preheat your press to ensure you achieve optimal results and that the transfer adheres properly to your garment.
- With light pressure pre-press your garment for 3-5 seconds. This removes any moisture from the fabric and eliminates any creases or wrinkles that may interfere with proper adhesion of the transfer.
- Press for 10 seconds between 260°-330°F

Storage:

Recommend storage at 70°F to 75 °F (21°C to 23°C) avoid storage in direct sunlight or in extreme temperature conditions.

Available in multiple sizes:

Sheets: 8.5"x11" (100 Sheets), 8.5"x11.7" (30 Sheets/ 100 Sheets), 13"x19" (100 Sheets)
 Rolls: 11.8"x328' , 13"x328' , 14.5"x328' , 23.6"x328' , 26"x328' , 30"x328' , 32"x328' , 36"x328'
