# (C) Chemical Consultants INCORPORATED

# **Eco-Strip<sup>®</sup> Part C**

#### **Super Concentrated Emulsion Remover**

## **GENERAL DESCRIPTION**

Eco-Strip<sup>®</sup> Part C is designed for removal of all photopolymer, diazo, and capillary film emulsions. Eco-Strip<sup>®</sup> Part C will immediately liquify and break down the emulsion. Dramatically increase the speed of the reclaim procedure.

#### **ADVANTAGES**

- Economical
- Easy to use
- Immediately breaks down emulsion
- Low Odor
- Safe on all types of mesh
- Non-Hazardous (after dilution)
- Biodegradable / Drain Safe (after dilution)
- Super Concentrated
- Ideal for use in all Automated Reclaiming Systems (will not crystallize, coagulate, or plug nozzles)
- Ideal for use in dip tank applications

### **Application**

Packaging

1 quart

Eco-Strip<sup>®</sup> Part C must be diluted with water before use, dillute up to 1:50 water.

Eco-Strip<sup>®</sup> Part C can be applied by a sponge, pad, spray bottle, dip tank, or pneumatic pump systems.

**Step 1**. After removal of ink, blockout, and tape, apply Eco-Strip® Part C to a wet screen (both sides).

1 gallon

**Step 2.** Scrub screen with nonabrasive pad or brush.

**Step 3.** High pressure rinse - starting at bottom.

**Quick Tip:** 

Use a dilution that has plenty strength to break down the emulsion.

Emulsions, that are not properly broken down, will leave excessive residue on the mesh.
