EnviroWipe®s

Enviro Friendly Ink and Screen Wipes

General Description

EnviroWipe®s are an environmentally friendly solution for your tough clean up jobs. They are intended for screen printing applications. EnviroWipe®s are designed primarily for plastisol and water-based ink. Ideal for the following: production color changes, ink clean-out for screens, removing ink from frames, cleaning equipment, squeegees and flood bars, spatulas, buckets, sample department, and ink mixing department.

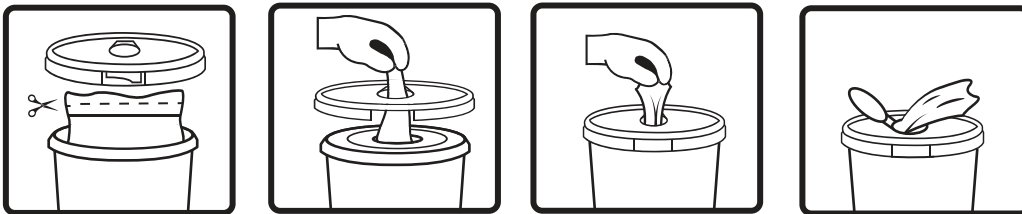

Advantages

- Environmentally Friendly
- Pleasant Odor
- Water-Based Formulation
- Easy and Convenient To Use
- Tough Enough To Cut Through Ink On All Substrates
- Reduce The Number Of Shop Rags Used
- 150 EnviroWipe®s Per Container
- Products Have No Hazardous Components, Ships Non-Hazardous
- Air Quality Management District (AQMD) Compliant, Low VOC (Volatile Organic Compound) Formulation
- Does Not Require Reporting To Agencies (Not Regulated) No Hazardous Air Pollutants (HAPS)

Quick Tip:

To cut down on the number of EnviroWipe®s it takes to clean a screen, remember to remove large deposits of ink residue left behind after each print job.

DIRECTIONS

Look For More Information on all the Products in the *EnviroLine*® of "Green" Chemistry.

Applications

Step 1. Card excess ink from screen

Step 2. Apply envirowipes to both side of screen

Step 3. Wipe away remaining residue with paper towel

Step 4. End Result

Sizes Available:

1 Gallon Container (150 wipes)
