

# Chemical Consultants INCORPORATED

**GB-1000**

**Paste Haze Remover**

## General Description

**GB-1000 is a paste ghost/image stain remover that is designed for all ink systems. GB-1000's blend of water-based alkaline cleaners and solvent active detergents completely clean the mesh of stains. GB-1000 is designed to work fast, which greatly increases screen turn-around.**

### **Quick Tip:**

**Flood rinse (hose pressure) the screen prior to the high pressure step.**

**This will eliminate the product from being atomized in the air (blow back)**

## Advantages

- **Creamy Paste**
- **Fast Acting**
- **Biodegradable / Drain Safe**
- **Low Odor**
- **Low VOC (Volatile Organic Compound)**
- **High Load Capacity To Reduce Usage**
- **Non Flammable**
- **Mesh Safe**
- **Ideal For Use On Multiple Deep Stains**
- **Contains A Proprietary Mesh Protector**

*\*Use of a High Pressure Unit Greatly Increases Product Performance.*

**1022 HP**  
1000P.S.I.

## Application

**Step 1.** Apply **GB-1000** to both sides of the screen.

**Step 2.** Scrub screen with non-abrasive pad or brush. Allow screen to sit for up to 10 minutes.

**Step 3.** High pressure rinse - starting at bottom.
