GR-10

Graphic Ink Degradent / Screen Wash

General Description

GR-10 is a water soluble ink degradent. It is highly effective on multi-purpose (solvent based), poster, UV, and electronic inks. GR-10 will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary.

GR-10 can be used in a wide variety of innovative cleaning processes ranging from re-circulation machines, dip tanks, immersion cleaning processes, and automatic reclaiming machines. It can also be applied manually with a scrub pad, spray bottle, or pneumatic pump systems.

Advantages

- Low Odor
- High Solvency
- High Load Capacity To Reduce Usage
- High Flash Point / Non-Flammable
- Mesh Safe

Applications

Always card excessive ink from screen.

Quick Tip:

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.

Step 1.

Spray GR-10 on both sides of the screen.

Step 2.

Scrub screen with a non-abrasive pad or brush until all ink is completely liquified.

Step 3.

High pressure rinse the screen - starting at the bottom. Reverse screen and high pressure rinse. Continue washing off any blockout that remains.

Sizes Available:

Quart

Gallon

4 x 1 Gallon

5 Gallon Pail

55 Gallon Drum
