## GR-7

## Graphic Ink Degradent / Screen Wash

### General Description

GR-7 is a water soluble ink degradent. It is highly effective on multi-purpose (solvent based), poster, UV, and electronic inks. GR-7 will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary.

GR-7 can be used in a wide variety of innovative cleaning processes ranging from re-circulation machines, dip tanks, immersion cleaning processes, and automatic reclaiming machines. It can also be applied manually with a scrub pad, spray bottle, or pneumatic pump systems.

### Advantages

- Low Odor
- High Solvency
- High Load Capacity To Reduce Usage
- High Flash Point / Non-Flammable
- Non-Hazardous
- Mesh Safe

### Applications

Always card excessive ink from screen.

#### Quick Tip:

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.

#### **Step 1.**

*Spray GR-7 on both sides of the screen.*

#### **Step 2.**

*Scrub screen with a non-abrasive pad or brush until all ink is completely liquified.*

#### **Step 3.**

*High pressure rinse the screen - starting at the bottom. Reverse screen and high pressure rinse. Continue washing off any blockout that remains.*

#### Sizes Available:

Quart

Gallon

4 x 1 Gallon

5 Gallon Pail

55 Gallon Drum
