## GR-9

## Graphic Ink Degradent / Screen Wash

### General Description

**GR-9 is a water soluble ink degradent. It is highly effective on lacquer, legend, enamel, epoxy, multi-purpose (solvent based), poster, UV, and vinyl inks. GR-9 will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary.**

**GR-9 can be used in a wide variety of innovative cleaning processes ranging from re-circulation machines, dip tanks, immersion cleaning processes, and automatic reclaiming machines. It may also be applied manually with a scrub pad, spray bottle, or pneumatic pump systems.**

### Advantages

- Low Odor
- High Solvency
- High Load Capacity To Reduce Usage
- High Flash Point / Non-Flammable
- Non-Hazardous
- Mesh Safe
- Multiple Applications

### Applications

**Always card excessive ink from screen. Use one of the following applications.**

**4 x 4 Stainless Steel  
Recirculating Booth**

#### **Recirculating Wash:**

*Card excessive ink from the screen. This product can be continuously recirculated until product becomes too heavily soiled with solids. Used product may be filtered and reused.*

**Sizes Available:**

**Quart**

**Gallon**

**4 x 1 Gallon**

**5 Gallon Pail**

**55 Gallon Drum**

#### **Quick Tip:**

**Always pressure wash screen from the bottom and work upwards.**

**This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.**

#### **Ink Wash-Out At The Sink:**

*Card excessive ink from the screen. Apply GR-9 to ink side of screen. Use a non-abrasive scrub brush or pad to agitate ink on both sides of screen. Finally, rinse away all residue away using high pressure water.*
