INK WASH 90

Low VOC Ink Wash / Recirculating Wash

General Description

Ink Wash 90 is a water soluble ink wash designed for the removal of plastisol, water based, UV and conventional inks. Ink Wash 90 is also ideal for the clean up of squeegees and flood bars. This product can be re-circulated or applied manually using one of the following applications.

Advantages

- Non-Hazardous
- High Solvency
- Low Odor
- Low VOC (Volatile Organic Compound)
- High Load Capacity To Reduce Usage
- Can Be Used As A Recirculating Cleaner Or To Wash Single Parts
- Mesh Safe

Applications

Always card excessive ink from screen. Use one of the following applications.

**4 x 4 Stainless Steel
Recirculating Booth**

Recirculating Wash:

Card excessive ink from the screen. This product can be continuously recirculated until product becomes too heavily soiled with solids. Used product may be filtered and reused.

Sizes Available:

Quart Gallon 4 x 1 Gallon 5 Gallon Pail 55 Gallon Drum

SCAQMD Bulletin:

Ink Wash 90 is a water soluble ink de-gradent which meets the requirements of Southern California AQMD to be compliant of 100 grams VOC per liter or less.

Ink Wash-Out At The Sink:

Card excessive ink from the screen. Apply to ink side of screen. Use a non-abrasive scrub brush or pad to agitate ink on both sides of screen. Finally, rinse away all residue away using high pressure water.

Quick Tip:

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.
