

L.T.C. GLO BASE

LOW TEMPERATURE CURE PLASTISOL INK

L.T.C. Glo Base is a semi translucent plastisol ink that is press ready. This ink has a short body and low wet tack for easy printing. It prints on a variety of fabrics but is best when printed on lighter colored fabrics. When exposed to light and viewed in a darkened setting it produces a bright glowing effect.

Product Overview/ Advantage:

- Bold & Vibrant especially when combined with D-Flo (Fluorescent) ink system
- Universal plastisol ink for a variety of fabrics
- Low temp curing 270°F
- Build-Up resistant, excellent flow characteristics
- Wet-on-Wet Printing
- Shorter Flash Times
- Non-Phthalate
- CPSIA Compliant

Preparation : This glow in the dark plastisol ink can be used as is straight from the container without any modifications.

Application: For best results use on 100% cotton and some cotton/poly white shirts. When printing on dark fabrics we recommend printing on top of a color. To achieve special effects, overprint our D-Flo inks for a unique fluorescent and bright glow.

Curing Temperature : L.T.C. is a low cure plastisol ink, this means that while traditional plastisol inks will cure between 320°F -330°F, L.T.C. will fully cure at around 270°F.

Storage: Recommended storage: less than 80°F (27°C). Avoid storage in direct sunlight or in extreme temperature conditions. For more information refer to Safety Data Sheet.

Available: 1 Quart, 1 Gallon, 5 Gallon, 50 Gallon
