MICROWASH

Graphic & Textile Screen Wash

General Description

MicroWash is a water soluble ink degradant. It is highly effective on multi-purpose (solvent based), plastisol, poster, UV, water-based and vinyl inks. MicroWash will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary.

MicroWash can be used in a wide variety of innovative cleaning processes ranging from re-circulation machines, dip tanks, immersion cleaning processes, and automatic reclaiming machines. It can also be applied manually with a scrub pad, spray bottle, or pneumatic pump systems.

Advantages

- Low Odor
- High Solvency
- High Load Capacity To Reduce Usage
- Non-Hazardous / Non-Flammable
- Low VOC (Volatile Organic Compounds)
- Mesh Safe

MicroWash can be used in concentrated form, or it can be diluted up to 1 to 2 parts water.

Applications

Always card excessive ink from screen. Use one of the following applications.

Ink Wash-Out At The Sink:

Card excessive ink from the screen. Apply **MicroWash** to ink side of screen. Use a non-abrasive scrub brush or pad to agitate ink on both sides of screen. Finally, rinse away all residue away using high pressure water.

**4 x 4 Stainless Steel
Recirculating Booth**

Recirculating Wash:

Card excessive ink from the screen. **MicroWash** can be continuously recirculated until product becomes too heavily soiled with solids. Used product may be filtered and reused.

Sizes Available:

Quart

Gallon

4 x 1 Gallon

5 Gallon Pail

55 Gallon Drum

Quick Tip:

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.
