

## GENERAL DESCRIPTION

ProChem® 101G is a water soluble ink degradent. It is highly effective on plastisol, multi-purpose (solvent based), poster, UV and vinyl inks. ProChem® 101G will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary.

ProChem® 101G can be used in a wide variety of innovative cleaning processes ranging from re-circulation machines, dip tanks, immersion cleaning processes, and automatic reclaiming machines. It can also be applied manually with a scrub pad, spray bottle, or pneumatic pump systems.

## ADVANTAGES

- Low Odor
- High Solvency
- High load capacity to reduce usage
- High flash point / Non-flammable
- Non-Hazardous
- Mesh safe
- Will not attack cyanoacrylate (instant) adhesives
- Multiple applications

## APPLICATIONS

Always card excessive ink from screen. Use one of the following applications.

**4 x 4 Stainless Steel Recirculating Booth**

[Click here for more details.](#)

### **RECIRCULATING WASH:**

Card excessive ink from the screen. ProChem® 101G can be continuously recirculated until product becomes too heavily soiled with solids. Used product may be filtered and reused.

## **Available in:**

**1 gallon**

**5 gallon**

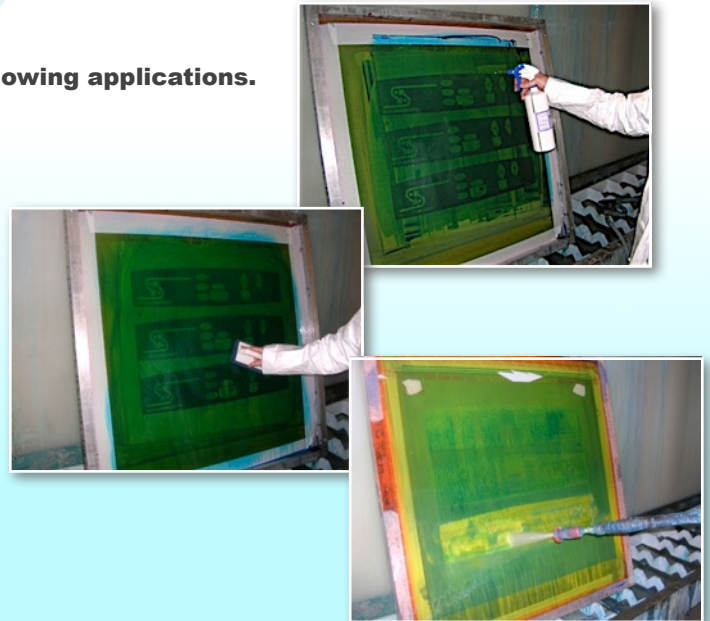

**30 gallon**

**55 gallon**

### **Quick Tip:**

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.

### **INK WASH-OUT AT THE SINK:**

Card excessive ink from the screen. Apply ProChem® 101G to ink side of screen. Use a non-abrasive scrub brush or pad to agitate ink on both sides of screen. Finally, rinse away all residue away using high pressure water.
