

## General Description

ProChem® 460R is a semi-viscous, water soluble cleaner. It is designed for the removal of a variety of inks without attacking the emulsion. ProChem® 460R top priority is plastisol and water-based inks. This product can be used for total removal of inks before reclaiming the screen. For reclamation, this product can be diluted 50/50 with water and still maintain excellent cleaning power.

## Advantages

- Water-based
- Low odor
- Low VOC (volatile organic compounds)
- High Solvency
- High load capacity to reduce usage
- Non-hazardous
- Will not attack cyanoacrylate (instant) adhesives
- Concentrated

### Quick Tip:

Always pressure wash screen from the bottom and work upwards.

This will prevent ink from locking back onto the mesh when coming in contact with the rinse water.

## Application

### Step 1.

Spray ProChem® 460R on both sides of the screen.

### Step 2.

Scrub screen with a non-abrasive pad or brush until all ink is completely liquified.

### Step 3.

High pressure rinse the screen - starting at the bottom. Reverse screen and high pressure rinse. Continue washing off any blockout that remains.
