

GENERAL DESCRIPTION

ProChem® ES-530 is designed for the removal of all photo polymer, diazo, and capillary film emulsions. ProChem® ES-530 will immediately liquify and break down the emulsion and dramatically increase the speed of the reclaim procedure.

ADVANTAGES

- Easy to use
- Immediately breaks down emulsion
- Low Odor
- Safe on all types of mesh
- Non-Hazardous
- Biodegradable / Drain Safe
- Concentrated

Quick Tip:

Use an emulsion remover that has plenty strength to break down the emulsion.

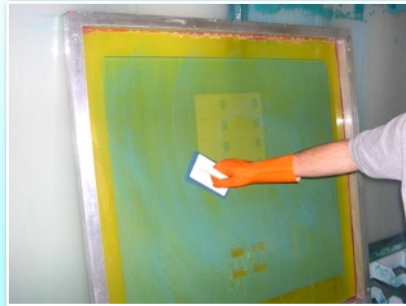

Emulsions, that are not properly broken down, will leave excessive residue on the mesh.

APPLICATIONS

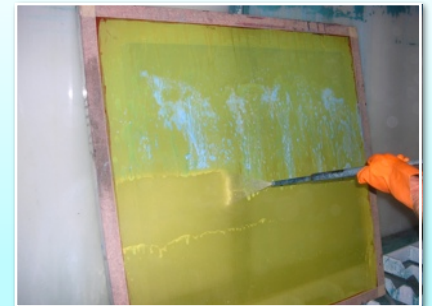

ProChem® ES-530 can be used in concentrated form, or it can be diluted up to 1 to 4 parts of water. ProChem® ES-530 can be applied by a sponge, pad, spray bottle, or pneumatic pump systems.

Step 1. After removal of ink, block-out, and tape, apply ProChem® ES-530 to a wet screen (both sides).

Step 2. Scrub screen with non-abrasive pad or brush.

Step 3. High pressure rinse - starting at bottom.
