

GENERAL DESCRIPTION

ProChem® ES-900 is designed for the removal of all photo polymer, diazo, and capillary film emulsions. ProChem® ES-900 will immediately liquify and break down the emulsion and dramatically increase the speed of the reclaim procedure.

ADVANTAGES

- Economical
- Easy to use
- Immediately breaks down emulsion
- Low Odor
- Safe on all types of mesh
- Non-Hazardous (after dilution)
- Biodegradable / Drain Safe
- Super Concentrated
- Ideal for use in all Automated Reclaiming Systems
- (will not crystallize, coagulate, or plug nozzles)
- Ideal for use in dip tank applications

APPLICATIONS

ProChem® ES-900 can be used in concentrated form, or it can be diluted up to 1 to 30 parts of water. ProChem® ES-900 can be applied by a sponge, pad, spray bottle, dip tank, or pneumatic pump systems.

Quick Tip:

Use an emulsion remover that has plenty strength to break down the emulsion.

Emulsions, that are not properly broken down, will leave excessive residue on the mesh.

Step 1. After removal of ink, block-out, and tape, apply ProChem® ES-900 to a wet screen(both sides).

Step 2. Scrub screen with non-abrasive pad or brush.

Step 3. High pressure rinse - starting at bottom.
