

General Description

ProChem® Perfect 71 is designed for all inks, especially vinyl, epoxy, solvent- base enamel and UV inks. This product will perform as a press wash when changing colors between jobs and/or as a screen opener for continuous printing. ProChem® Perfect 71 will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary. ProChem® Perfect 71 immediately liquifies the ink and dries quickly, leaving no film or oily residue.

Advantages

- Fast Drying
- Emulsion Safe
- High Solvency
- Low Odor
- High Load Capacity To Reduce Usage
- Mesh Safe

Application

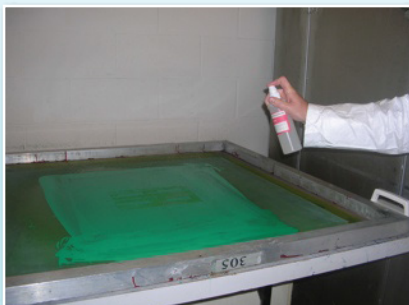

First card excessive ink from the screen.

ProChem® Perfect 71 can be applied manually with a rag, spray bottle, or pneumatic pump systems.

Quick Tip:

To cut down on the number of rags it takes to clean a screen, use a non absorbent scrub pad to liquify the ink and a squeegee to pull all the ink to one end of the screen and wipe up with one or two rags.

Press Wash And Screen Opener

Step 1. Spray Perfect 71 on the squeegee side of screen.

Step 2. Scrub ink with a non-absorbent pad until liquified.

Step 3. Use rags or towels to wipe up ink residue. Re-apply to clean up ink residue in image area.
