

General Description

ProChem® Spray Kleen 301 is a premium spot remover formulated for the removal of cured plastisol, water-based ink, and flock adhesive. This lightning fast-drying formula removes ink quickly without allowing the ink to bleed and spread. Spray Kleen 301's ultra clean and pure ingredients ensure that "yellowing" of the fabric does not occur.

Quick Tip:
If ringing or spotting occurs, adjust spot gun tip to widen spray area.

Advantages

- No "ringing"
- No "yellowing"
- Lightning fast drying time
- Non-Flammable
- Immediately dissolves inks and adhesives
- Ideal for use in electric spot guns
- Premium pure components - no "fillers"
- No VOC (volatile organic compounds)
- No Ozone Depleting Chemicals

Application:

Direct a jet of fluid through the soil until completely flushed away.

** This job can be performed more effectively and efficiently with the use of CCI's TT 250 exhausting unit. This exhauster will also greatly limit the amount of exposure to the spot cleaning fluid.*
