

# Chemical Consultants INCORPORATED

**RC-5**

**Graphic & Textile Press Wash**

## General Description

RC-5 is designed for all inks, especially vinyl, water base, epoxy, plastisol, enamel and UV inks. This product will perform as a press wash when changing colors between jobs and/or as a screen opener for continuous printing. RC-5 will protect the fabric from deep stains or ghosting from the image print. This makes it much easier when complete reclamation of the screen is necessary. RC-5 immediately liquifies the ink and dries quickly, leaving no film or oily residue.

## Advantages

- Fast Drying
- Emulsion Safe
- High Solvency
- Low Odor
- High Load Capacity To Reduce Usage
- Mesh Safe

### Quick Tip:

To cut down on the number of rags it takes to clean a screen, use a non absorbent scrub pad to liquify the ink and a squeegee to pull all the ink to one end of the screen and wipe up with one or two rags.

## Application

First card excessive ink from the screen.

RC-5 can be applied manually with a rag, spray bottle, or pneumatic pump systems.

**Step 1.** Spray RC-5 on squeegee side of screen.

**Step 2.** Scrub ink with a non-absorbent pad until liquified.

**Step 3.** Use rags or towels to wipe up ink residue. Re-apply to clean up ink residue in image area.
