

Tabs II

Concentrated Degreaser

GENERAL DESCRIPTION

This product is a super concentrated formula for degreasing and wetting all types of screen fabrics, including polyester, nylon and stainless steel. When completely water rinsed, TABS II leaves your fabric free of silicones or other types of oils that tend to leave a film or slippery active surface. Tabs II will dramatically reduce the incidence of “pin-holes” and “fish-eyes” when coating your screens with emulsion.

ADVANTAGES

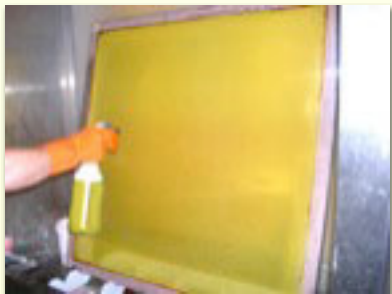

- Concentrated
- Easy to use.
- Safe on all types of mesh.
- Non-flammable.
- Biodegradable / Drain safe
- Drain acceptable to a treatment plant, after soil release, when used as directed.
- Non-Photochemically Reactive.
- Non-Hazardous

Application

Tabs II can be used in concentrated form, or it can be diluted up to 1 to 20 parts of water. Tabs II can be applied manually by a sponge, spray bottle or pneumatic pump system.

Quick Tip:

Be sure to Flood rinse the screen well. In this step, it is important to think of high volume and not high pressure water.

1) After removal of ink, block-out, and emulsion, spray Tabs II to the screen (both sides).

2. Scrub screen with non-abrasive pad or brush.

3. Flood rinse the screen starting at the top and washing all residue off the screen.

Packaging

1 gallon 5 gallon Pail 55 gallon Drum
