

UV DTF INK

CYAN / MAGENTA / YELLOW / BLACK / WHITE / VARNISH

Our Ultraviolet Direct to Film (UV DTF) Ink is specially formulated to provide vibrant, long-lasting colors with exceptional detail for every print. UV DTF Ink is designed to deliver flawless prints every time, offering unmatched performance and reliability for your printing needs.

Advantages

- Delivers sharp, vivid, and opaque colors for stunning 3D embossed effects
- Rapid polymerization, enabling high-speed production without smudging
- Bonds permanently to hard surfaces including glass, metal, acrylic, ceramic, wood, and plastic
- Exceptional durability against daily wear and tear
- Anti-Settling Formula
- Resistant to moisture, detergents, and industrial solvents after curing
- High lightfastness ensures prints remain vibrant even with prolonged exposure to sunlight
- Maintains film integrity on curved or slightly flexible surfaces without cracking or peeling
- Low-VOC and low-odor

Storage Store at less than 35°C (95°F) **Quick Tip!** Shake well before adding to your machine.
